# Supercharge Desktop Performance with Liquidware Labs, Citrix and Nutanix

Combining true best-of-breed solutions allows you to avoid the time, money, and headaches often associated with one-off designs. The category leaders in Mobile Cloud, Hyperconverged Infrastructure, and Next-Generation Workspace Management have come together to offer one, cohesive, tested, scalable, and affordable solution.

With the Liquidware Labs, Citrix and Nutanix solution, you can quickly ramp up user-experience and productivity with high-performance workspaces for your end users.

Liquidware Labs™ provides comprehensive User Environment Management, Application Layering and User Experience Monitoring in one convenient and extremely affordable suite known as Essentials, which includes ProfileUnity with FlexApp and Stratusphere UX. End-user computing projects that incorporate the Essentials bundle reduce infrastructure and user-management costs, while improving desktop user experience and flexibility.

Citrix® is the leader in application delivery and desktop virtualization, providing a complete, flexible solution that delivers Windows® applications and desktops to any user on any device while keeping valuable information locked down in the datacenter. By combining granular controls with an uncompromised user experience, Citrix application and desktop virtualization technology helps your organization keep pace with changing business demands while increasing productivity, simplifying management, improving security and reducing costs.

Nutanix® delivers invisible infrastructure for next-generation enterprise computing by natively converging compute, storage and virtualization resources into a turnkey hyperconverged solution. The world's most advanced enterprise datacenters rely on Nutanix web-scale technology to power their mission-critical workloads at any scale.

The combination of Liquidware Labs end-user computing solutions, together with the simplicity and scalability of Nutanix, provides a definitive architecture for flexible, manageable, high performance Citrix XenDesktop and XenApp deployments. These best-of-breed solutions together deliver scalability and cost-effectiveness that few others can deliver.

Customers worldwide are realizing that the addition of Liquidware Labs Stratusphere UX and ProfileUnity with FlexApp to their Windows® delivery platform of choice gives them the agility, visibility, scalability and performance to ensure optimal user experience. These solutions — offering highly sought features and functionality — coupled with the web-scale benefits of Nutanix — result in unparalleled TCO, while delivering tremendous scalability and user experience for Citrix desktop architectures.

> "Customers looking for Citrix Ready verified user environment management, application layering, and added user experience visibility will find great value in Liquidware Labs Essentials bundle. This set of solutions includes specialized features expressly made to support Citrix XenDesktop and XenApp environments. Our mutual customers will gain additional options to rapidly on-board users, deliver applications, and grow and scale their deployments while ensuring a quality user experience."
>
> **Sid Rabindran**
> *Director, Citrix Ready at Citrix*

> "Liquidware Labs hits the sweet spot in terms of offering enterprise class end user computing software at a very attractive price point. They were among the first to fully support Nutanix Acropolis and their close collaboration with Citrix is a key value add to customers and our partnership."
>
> **Venugopal Pai**
> *VP of Global Alliances and Business Development at Nutanix*

> "Desktop architects, administrators, and CIO's want to deploy reliable, resilient, scalable workspaces to make their users, staffs, and budgets productive. However, the manual labor and brute force needed up until now was overwhelming. Citrix, Nutanix, and Liquidware Labs delivers on the promise of simple, scalable, affordable, and invisible virtual desktop infrastructure. Period."

User Environment Management with ProfileUnity

- One user profile across VDI, RDSH, DAAS and physical desktops
- Up to 10x faster logons vs. roaming profiles
- Application and user rights management
- Location/context-aware policy and profile capabilities
- Automated migration to Windows 7/8.1/10* and Server2008/12r2

Application Layering with FlexApp

- Streamline base image management
- Deliver applications on-demand
- Persistent user-experience on non-persistent infrastructure

Visibility with Stratusphere UX

- User experience monitoring
- Diagnose root causes of issues and bottlenecks
- Optimize resource capacity and performance

Virtual Desktops with XenDesktop

- Undisputed market leader with over 300,000 customers
- Mobile, cloud, and workspace delivery flexibility
- Enterprise scalability and performance

Published Applications and Desktops with XenApp

- Unmatched user experience
- Simplified management
- Unified architecture for apps & desktops

Converged Infrastructure and Virtualization with Nutanix

- Purpose built for simple deployment and high performance for VDI
- Full control via PRISM™ Management Console with API Integration
- Linearly scalable for predictable growth in both performance gains and infrastructure costs
- Radically simplify and orchestrate compute and storage provisioning in one console
- Distributed File System and Replication (Shadow Clones) intelligently optimizes VDI deployments using software instead of manual configuration

*Windows 10 support planned for Q4 2015.
