# Activate Your License Through Nutanix Prism and Support Portal

This document briefly describes how to generate a license key for your Nutanix product for Pro or Ultimate licenses.

Five Easy Steps to Activate Your Nutanix License

Nutanix goes from in-the-box to running virtualized applications on your choice of hypervisor in a matter of minutes. No complicated configuration.

1 Purchase your licenses through your sales partner. You will receive an email with license details once your licenses are provisioned and license grants will be placed in your support portal account.

> **Purchase licenses from Nutanix**

2 Create a new cluster if necessary. Login to the Prism GUI to view and download the cluster summary file from "Licenses."

> **Login to Prism to view & download cluster summary file**

3 Login to the Nutanix support portal at portal.nutanix.com and go to "Licenses." Providing a valid serial number and corporate email address will allow you to create a new login account if needed.

> **Login to Nutanix Support Portal**

4 Upload the cluster summary file (from Step 2) to the Nutanix Support Portal, configure your licenses and download the license key file.

> **Upload cluster summary file, configure licenses and download license key file**

5 Upload the license key file in the Prism GUI to enable the license features.

> **Upload license key in Prism**

For detailed information regarding new license features, generating license keys and upgrading existing features, see your product documentation. For additional assistance please contact Nutanix Support by opening a case via phone or support portal.
